RESEARCH OVERVIEW AND INTERESTS

My research focuses on solving the “last inch” problem and solving the challenges that stand between the burgeoning Internet of Things and inevitable Internet of Everything. My research vision pushes towards the realization of ubiquitous and pervasive computing, aiming to understand how our interaction and utilization of technology will shift as computing becomes omnipresent and its operation and interaction shifts from conscious action to unconscious extension of perception and ability. What advancements will most change how people interact with themselves, the world, and one another, and what innovations facilitate these paradigm shifts? My interests span from low-level details—developing new technology to meet the energy and area demands of next-generation millimeter systems—to large-scale global considerations—understanding how our network and infrastructure must scale and adapt to support the trillions of impending devices.

EDUCATION

University of California, Berkeley, Berkeley, CA (2017–present)
Ph.D. Student in Electrical Engineering (degree expected summer 2019)
Advisor: Prabal Dutta

University of Michigan, Ann Arbor, MI (2012–2017)
M.Eng. in Computer Science
Advisor: Prabal Dutta

University of Michigan, Ann Arbor, MI (2007–2012)
B.S.Eng in Computer Engineering

AWARDS AND HONORS

University of Michigan Rackham Graduate School Outstanding Graduate Student Instructor (2017)

University of Michigan College of Engineering Richard & Eleanor Towner Prize for Outstanding Graduate Student Instructors (2017)

University of Michigan College of Engineering Featured Graduate Student (Fall 2014)

Qualcomm Innovation Fellowship Honorable Mention, Team Fellowship with Brad Campbell, \$50,000 (2013–2014)

National Defense Science & Engineering Graduate Fellowship, \$95,000 plus tuition (2013–2016)

National Science Foundation Graduate Research Fellowship, \$90,000 plus tuition (2013, declined)

University of Michigan Department of Computer Science First-Year Fellowship (2012–2013)

Best Undergraduate Instructor, University of Michigan, EECS (2011–2012)

INVITED PRESENTATIONS

Invited Talk: MBus: A power-aware interconnect for ultra-low power micro-scale system design, at DARPA Near Zero Power RF and Sensor Operations (N-ZERO) Program Review (2016)

Invited Talk: Ultra-Wideband and Indoor Localization, at HotWireless'16

Keynote Address: The Recent Past and Distant Future of [Micro-Scale] Embedded Systems, at NextMote: Next Generation Platforms for the Cyber-Physical Internet, part of the International Conference on Embedded Wireless Systems and Networks (EWSN'16)

PolyPoint and the First Steps Towards Ubiquitous Localization, at the Student Summit on Mobility, Systems, and Networking, Microsoft Research

Guest Speaker: Sensor Systems and the Art of Effectively Deploying Sensor Networks, TechChange TC111: Technology for Monitoring and Evaluation

Invited Talk: Embedded System Design and the Internet of Things, Stanford Internet of Things Industrial Research Program

Invited Talk: Sensing Technologies for Data Collection and Monitoring, State of the Science, Development Impact Lab (DIL) and USAID Higher Education Solutions Network (HESN)

MBus: Enabling the Next Generation of Sensors and Systems, TerraSwarm Annual Meeting

TEACHING

Primary Instructor, EECS 398: Computing for Computer Scientists (F'16, W'16)

A new class designed and built from scratch. This class attempts to address the experience gap that exists across the spectrum of incoming Computer Science students. While driven by tools (shells, build systems, debuggers, version control), it explores how and why computer scientists interface with computers differently in their day-to-day activities, how to apply principles learned in courses to everyday activities, and ultimately how to be a more efficient user of computing resources.

<https://c4cs.github.io>

In 2017, I was awarded the Rackham Graduate School Outstanding Graduate Student Instructor and the College of Engineering Richard & Eleanor Towner Prize for Outstanding Graduate Student Instructors for this course.

Graduate Teaching Assistant, EECS 373: Design of Microprocessor Based Systems (F'15, W'15)

Undergraduate Teaching Assistant, EECS 470: Computer Architecture (W'12)

Undergraduate Teaching Assistant, EECS 482: Introduction to Operating Systems (W'12, F'11, W'11, F'10)

Undergraduate Teaching Assistant, EECS 373: Design of Microprocessor Based Systems (F'11, W'11)

PROFESSIONAL SERVICE

2014 ACM Workshop on Visible Light Communication Systems – Demo Co-Chair

Recurring reviewer for IEEE Transactions on Circuits and Systems II (TCAS-II) *2013–present*

Recurring reviewer for IEEE Transactions on Mobile Computing (TMC) *2014–present*

Recurring reviewer for USAID Development Innovation Ventures (DIV) *2015–present*

Computer Science Engineering Graduate Student Body President *2013–2015*

Computer Science Engineering Student Faculty Representative *2015–2016*
